CUSTOMISED FOR MAXIMUM VALUE

BTP increase certainty and decrease risk by providing an in-house, full-suite, and agile service model. Our products and services are flexible and can be easily integrated to provide customised solutions, tailored specifically to your needs.

YOUR ONE-STOP-SHOP

BTP minimise the need to engage multiple vendors by providing an extensive supply of equipment and parts – across both new and previous generations of equipment - coupled with the expertise to manage the entire process.

TRUSTED EQUIPMENT DEALERS AND REBUILDERS

From small projects to 'tier-one' miners, we are the go-to-choice for used, rental, dismantled, and rebuilt equipment.

EQUIPMENT PURCHASE AND HIRE

Whether you need a single machine for a short period or an entire fleet for the life of your project - our well-maintained fleet provides the back-up you can rely on. Our equipment is expertly sourced via our reliable global supply networks, then inspected and tested in-house by our qualified personnel. Every piece of equipment comes with BTP's extensive warranty.

BRING NEW LIFE TO YOUR AGING FLEET

Delivering quality rebuilt equipment is what we do best. With specialist facilities and expert capabilities, we have what it takes to rebuild equipment ranging up to 240T class trucks, reduce down-time, extend your asset's longevity, and save on operational costs.

Why rebuild with BTP?

- Engage project management that delivers cost competitive results on-time.
- Skip long factory lead times.
- Access our extensive range of new and reconditioned parts.
- Secure comprehensive machine system testing and adjusting.
- Customise your build scope to suit specific requirements and budget.
- Access short and long-term hire options via BTP's fleet of rental equipment.
- Secure extensive certification and warranty.

REBUILD CASE STUDY

5 X CATERPILLAR 793 TRUCKS

SCOPE OF WORK

- Reconditioned and upgraded 3516HD engines to OEM specifications
- Hydraulic hosing and electrical harnesses and wiring replaced
- Chassis non-destructive testing, upgrades and repairs as required
- Reconditioned or replaced all major components
- Refurbished and updated cabins and operator controls
- Certified standard rims and stand-up tyres
- Mine-spec fire suppression systems and greasing systems
- Blasting and painting
- Caterpillar walkways and steps

CRITICAL PARTS WHEN YOU NEED THEM

When it comes to parts, BTP offer a variety of services centred around getting the best certainty and lifespan from your componentry. We provide:

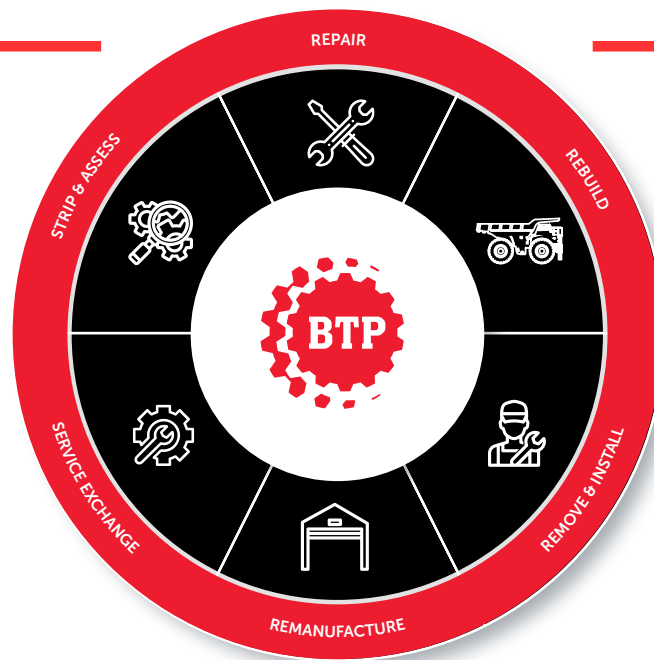

- Like-new reconditioning
- OEM-spec, after-market parts and component manufacture
- Custom parts and component manufacture

Our experienced team has been manufacturing and reconditioning parts for decades. Their expertise ensure that every part is handled in-house to Australian standards, tested to certify it meets rigid quality benchmarks, and is backed by BTP's extensive warranty.

Why choose BTP parts?

- Save up to 60% across our extensive range of quality OEM-alternatives and reconditioned parts.
- Secure parts for 1st, 2nd, and 3rd generation equipment.
- Access parts that have been specially engineered to improve upon OEM specifications.
- Reduce inventory holding costs – thousands of components are ready for action.
- Enjoy quicker turnarounds via our specialised facilities that enable greater control of manufacturing schedules.

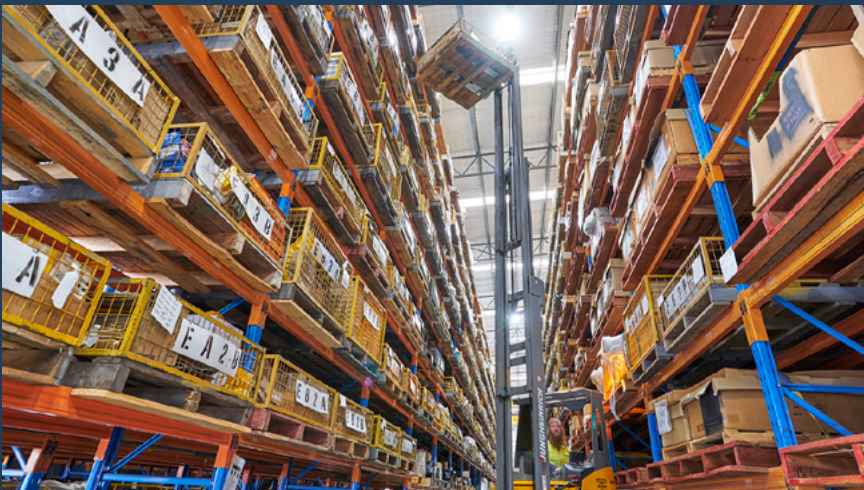

BTP TAILORED REPAIR OPTIONS

SERVICE EXCHANGE (SX) PROGRAM

BTP's SX Program provides full access to our cache of 'as new' reconditioned parts and components - ready to be swapped-out for failing items, the moment you need it.

This program is designed to support anything from unexpected breakdowns through to scheduled maintenance - with expert advice and same-day dispatch for urgent components.

FIELD SERVICE CASE STUDY

GRADER R/H TANDEM FAILURE

BTP were approached by a valued client to conduct repairs on a grader RH tandem chain failure.

Off-site repairs were requested, and our Newman field services team undertook an initial strip and assess of the component as well as a general inspection of the machine - where multiple stress points and contributing factors that led to the initial failure were identified.

Our team also pinpointed a number of issues associated with the power train that would continue to affect the machine reliability if left unchecked.

In addition to the initial failure, our qualified team completed the reseal of the LH tandem assembly,

as well as coolant and a rocker cover leak - which included an almost a full set of new threads for the rocker base.

The comprehensive inspection ensured the client had all the information necessary to proceed with the repairs. Our ongoing communication throughout the process provided confidence that the machine would be reliable when it returned to work.

Repairs were completed swiftly and the equipment was transported back to operations.

ON-SITE EXPERTISE AND RELIABLE SUPPORT

Based in Australia, we maintain a global reach - with established supply chains that span every continent.

BTP offers a skilled and highly responsive field service team, located within a strategic branch network. Our 280+ qualified service personnel have access to group capabilities, as well as BTP's component stores and international sales network.

We have the capacity to deliver maintenance services on-site, or off-site at a designated BTP location. BTP can support your site maintenance needs by providing:

- Planned servicing and maintenance
- Shutdown coordination and site support
- On-site breakdown repairs, fault finding, and diagnostic testing
- Machinery inspections and reports
- Leave coverage / backfill

Why engage BTP field services?

- Secure expertise at a moment's notice for whatever length of time needed
- Gain fully qualified personnel with varied industry knowledge and networks
- Includes fully equipped, mine-spec trucks with high-flow compressors and CV cranes
- Access our vast parts inventory and SX Program
- Leverage further value by accessing BTP's equipment and parts inventory

As a principles-driven company, BTP ensures that all our personnel are well-versed in world-class standards and conduct. We add value by providing qualified and trained personnel, who are experienced and dedicated to safety, efficiency, and service quality.

OUR PEOPLE

BTP's qualified personnel are our greatest asset. They bring an industry knowledge that spans all OEMs; generations of equipment; and across the asset lifecycle: from manufacture, through to on-site utilisation, maintenance, and reconditioning or rebuilding.

World-class safety standards

By protecting our people, we also provide greater certainty to our clients. We do this by adhering to our ISO 45001 Health and Safety certification, following Perenti's world-class critical risk framework; and by operating under the same rigorous safety protocols and compliance expectations as those found on tier-1 mine sites.

Committed to diversity

BTP have invested in a road map to achieve greater diversity across gender, background and capabilities. We have committed to 33% female participation by 2028, as well as a range of initiatives to ensure the emotional safety and mental health of all our people.

Qualified to deliver

The qualifications our people bring are varied and complimentary – from registered trade specialists through to expert engineers, management professionals and experienced support personnel. Together, they allow us to provide the trusted end-to-end service offering for which we are known.

Future focused

We also see the great value in continually investing in the next way of capable personnel. BTP have successfully delivered numerous apprenticeships over our 35-year history.

GLOBAL REACH, LOCAL FOCUS

BTP is part of the Perenti Group, an ASX diversified global mining services group with businesses in surface mining, underground mining, and mining support services.

The Group was founded in Kalgoorlie in 1987 and is today one of the world's largest companies providing surface and underground mining at scale.

Headquartered in Australia, Perenti has operations and offices across four continents and is creating enduring value and certainty for clients on some of the world's largest mining projects.

OUR PRINCIPLES

NO SHORTCUTS	NEVER WASTEFUL	WALK IN THEIR SHOES	SMARTER TOGETHER	ENABLE TOMORROW
We never compromise our standards. We strive for the best in everything we do and continue to raise the bar in safety, performance and transparency every day.	We make every moment count. We operate as efficiently as possible. We plan effectively, make full use of our assets and always spend our money wisely.	To win new clients, keep existing clients and to ensure everyone benefits, we have to really know them – not just who they are and what they're asking for, but what really matters to them.	None of us is as smart as all of us. By valuing our diversity, working together, sharing knowledge and supporting each other, we're capable of exceptional things.	We actively embrace change, enabling new technologies and smarter ways of working, so the mine of tomorrow is safer, more productive and more reliable than ever before.
